## **South Hackensack, New Jersey:**

### **Comprehensive Announces Addition of HDMI-EZ Termination System!**

The revolutionary HDMI-EZ HDMI termination system is the latest game changer from connectivity leader Comprehensive Cable.

For the first time ever, installers can quickly and easily terminate HDMI 1.4 capable assemblies (4k x 2k, 3D, Deep Color, 1080p and more) to custom lengths in the field using Comprehensive's exciting new HDMI-EZ termination system. This unique new product finally allows both commercial and residential installers to fully utilize the HD signals of their sources and displays without converting them by giving them the ability to run and terminate HDMI cables to the exact lengths needed on demand as they have done with analog cables for years.

The HDMI-EZ termination system consists of a uniquely designed connector assembly and crimp tool that uses the reliable IDC (Insulation Displacement Connection) termination process to quickly and easily terminate HDMI cables in the field.

The Comprehensive HDMI-EZ termination system works with 28 or 30 gauge HDMI cable and soon will include plenum and larger gauge versions. Native lengths of up to 40 feet can be achieved while supporting 1080p resolution. Longer lengths can be achieved by pairing up the cables with one of Comprehensive's HDMI booster solutions (exact resolutions and lengths dependant upon equipment).

#### **About Comprehensive**

Known as the industry standard for premium cable performance and reliability, Comprehensive has been the leader in professional video, audio and computer products for 35 years and is a division of New Jersey based Vcom International Multimedia Corporation.
